SHRI GURUDAS DAS GUPTA:

Will the Minister of DEFENCE be pleased to state:

(a) whether Government has taken a decision to enhance defence exports in a big way;

(b) if so, the details of the countries to which Defence equipments will be exported;

(c) the details of defence equipments which will be exported and under what terms and conditions; and

(d) the extent to which the country will get foreign exchange by way of such exports?

THE MINISTER OF STATE IN THE DEPARTMENT OF DEFENCE PRODUCTION AND SUPPLIES IN THE MINISTRY OF DEFENCE (SHRI CHINTAMANI PANIGRAHI): (a) to (d) A policy decision has been taken to give a thrust to the export of defence items, taking into account the capacities available in our production units and the requirements of our own defence forces. Such exports will be made, on merits of each case to friendly countries, subject to periodical assessment of the international situation. The defence equipments to be exported will depend on the requirements of the buyers and their availability with us. The export of defence stores will, generally, be on commercial basis. The volume of foreign exchange earning will depend on the orders received.

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (KUMARI SAROJ KHAPARDE): (a) The Government has seen the News Item appeared in the Hindustan Times dated the 2nd February, 1989.

There is no increase in the number of full blown AIDS cases in the last three months. However, because of intensification of Sero-surveillance there had been an increase in the number of persons screened and sero-positive persons and AIDS patients detected.

As of 31st January, 1989, 2,09,825 persons belonging to high risk groups viz. foreigners, blood donors, hetero-sexually

promiscuous males and prostitutes were screened and out of them 764 were found to be HIV sero-positives including 29 full blown AIDS cases comprising of 18 Indian and 11 foreigners.

(b) Out of 764 HIV sero-positive individuals detected upto 31st January, 1989, 68 were blood donors and 9 were pregnant women. The majority of HIV sero-positive individuals belonged to two high risk groups namely—promiscuous males (197) and promiscuous women (310).

(c) The Indian Council of Medical Research has been entrusted with the responsibility for organising surveillance for HIV infection. In addition, the Council is also pursuing research on virus isolation.

(d) In order to prevent the spread of AIDS in India, the Government have planned the following activities:—

Surveillance for detecting HIV infection;

Testing of blood used for transfusion and ensuring safety of blood products;

Establishment of clinics for health check up and counselling in metropolitan cities;

Strengthening of STD Clinics in Medical Colleges/District Hospitals;

Development of medicare facilities for treatment of AIDS patients in identified major hospitals;

Training of medical/para-medical personnel in case management;

Intensification of health education activities as under:—

Health education to increase awareness among general public;

Health education in schools and colleges; and

Education and counselling of high risk groups as well as persons with HIV infection.
